MERRY CHRISTMAS

Tuesday, May 15, 1973 Treeling Heights

A. U. M. C. at 9:30 am

from Hamilton Creek this morning.

Started trip from Daly Bore on Sunday, May 13.

Rained about 5-10 points ^{last night} very misty. Extremely blustery now, and cold.

Note: - It is well worth while travelling down the Hamilton Valley, ~~and~~ at here, several miles down ~~the valley~~ Hamilton is a whole series of rock pools, extending for at least a mile. Certainly the most extensive stretch of ~~rock pools~~ ^{rock pools} within the Flanders.

Kath Shurchiff

Lake Frome has blown!

19/VIII/74

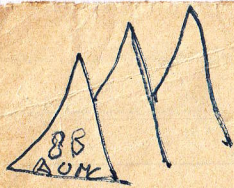

St Peter's College Rover Crew.

Arrived 4:00 pm yesterday from Old Noll mine or thereabouts. ~~to~~ Heading towards ~~the~~ Paratana Springs then back to Yudinamutana bore via the Armchair perhaps.

~~to~~ Spent the night up here. ~~to~~ Very good if you've got enough water.

Dear Sir/Madam,

Please find enclosed the complete collection of summit notes taken from Freeling Heights on June 4 1987. The small tin and glass jar remain for future notes. (Ward has it W.C. Bonython's early note was removed by himself in June of last year on the scientific expedition in that area). I have forwarded these to you for preservation on the recommendation of your contact, Susan Besser; also note that other summit notes/logs exist at Arkaroola Centre.
