June 7th 1986

This book & its container were donated to posterity by Adelaide Bushwalkers, and is one of many planned for the Flinders Ranges. The members reached the top on a glorious winter's day, and now here we go on to Pompeys Pillar & St Marys Peak. Lunched here, then returned to our packs, and on to camp site at Mt Ide.

DAY THREE OF LINK SIX

ARRIVED AT 12.15 pm

From Strathallbyn to Mt Alick

Shift

29/8/86

I left at 3.25pm on 29/8/86
 and we came from Black Gap this
 morning. The view from here is magnificent
 and I am fucked. It's been a
 sunny day but not well to look
 for yet. I have to leave 6.00pm. I
 leave a bloody drink up there. I have
 perhaps a couple of beers even though
 there are only 16. Maybe a
 couple of coobies. As I have
 read there have been a lot of people
 up there since I was there. I will
 probably tomorrow never be read.
 The bloody ski brochures are pretty useful.
 Good job.

13th → 18th

Slowest ascent of Mt Meck in living memory.
Luckily we had all day from Mt Ida
water tank to get here.

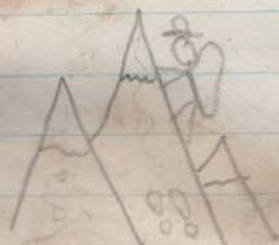

We are proud of our achievement.

On reaching the summit, several members
of the group were ready to say:

"I didn't think I could do it, but my
friends were great. They helped me on
and pushed on to this the summit of
my dreams."

We all now have characters bigger
than the Empire State Building (well, some
of us anyway).

Congrats to ABW on yet another
over-engineered log book box!

Arrived at 4.40pm on the 18th Great walk from

of the compared to ... But seriously folks
this is a really captivating country and should be
enjoyed by as many as possible.

Thanks for that Chris. My name is
Felicity and I think this is one hell of
a view. We finally got here after we
were lost a few times and suffered
major dehydration (and ...).
We still have to get back Jane - you
should have come you would have loved
this. I hope I don't fall off a cliff
or go sleep walking tonight. It is
a rather delicate place for a covertly
planned murder, going up here reminds
me slightly of Hanging Rock but the
bushes and things to scratch Niam's
mat to shreds. I would just like to
thank Niam for the use of the wood
socks 2. sleeping bag 3. Zet mat & and
last but not least the rock sock. And
mommy for having me and Jane
inviting letting me come (and ...)
and Jane for the substitute shorts and
her inspiration and encouragement and
the way (I likewise to her I am sure) and
Chris's cooking tea - pizza & ...

start walking backwards, or when the leader
says "where the fuck are we?" or "Sorry guys,
I just made a monumental fuckup!"

watch out!
it's getting
thick!!

As for being lost! Hall. No appreciation for "freelance pathfinding" - the art of redefining by-constants and the lie of the land to suboptimize the way forward with a general goal in the distance. All this talk of knowing exactly where one is - merely for the unconfident, whereas novices are much inferior to the ultimate AUMC breed! This peak was annihilated, but I'm getting up by force of morale looking at these majestically defunct wonderpieces - may the bomb drop soon so we can join the doomed (see "Walking in Your Footsteps" by Sting) out of harm's way! Go to Tasmania for some real scenery - where they make the mountains! Chris Lewis - you're a true mountain man! (Walk Through Shallow Water!) Dr. Peter Stevens.

Hello Mr. Heck Log-look, just seen an absolutely mind-blowing sunrise, which Chris sized (as per usual!). Absolutely fantastic views! Ormai to Mt Abrupt (do it!). Wouldn't it be great to be an eagle, soaring amidst this specy country. One wonders about the forces in the earth causing the ring of mountains peaks that can be appreciated so well from here. The Heyson to the left, the Drud range to the right, the Elder range, that we're sitting on. What a bumper that once getting here one has to come down! Jane Moses.

Having not been "Leach Hiding, & Mud Baking" in the infamous Tassie, like these other self proclaimed "hardened mountain men", I am unable to boast my own ruggedness by echoing the AUMC chorons of "That's all righting", you should have been down the Tassie.

Thus I will have to content myself with expounding on the rules for future mountainers.

Remember the AUMC are a little pain never

Great stuff! Fantastic sunrise and sunsets - try
silhouetting some yuccas with the terrapin
colors in back. Really appreciate these friendly
people from AUMC for bringing me along. Well
if you made it up here I don't have to describe
it to you. Enjoy it!!

Nice to be back!! The view remains wonderful
& the feeling ... amazing. It sure beats battling

certainly worth the tired feet to come again.
I'll definitely be back. Disappointed to find that
the notes we wrote last time have disappeared.
Take care of this wonderful place please
it is one of a kind!!

Sue Hillman.

PS Dear Tom,

I'm amazed that I'm here without
you. Would like to share the sunshine & views
with you. Maybe next time. Sue

aaaaah! wonderful, fantastic, too beautiful
to describe. You definitely have to come up
here to experience the view. Places like
this are hard to share with one, if
you didn't share it together, can't explain
how beautiful it really is.

Lynn Thompson.

Magnificent, worth every puff. A place
to bring friends and share it. The best
views are often the hardest to reach,
but always worth it.

At 1315 hours one Peter Woodlands beheld the aluminium container in which the log book resides and, with an air of great wisdom, pronounced it to be not an ABW product. The infamous Peter Woodlands, obviously approaching senility, is in the care of Wilfred Reichmann, Richard Allen and James Bruford. I must cease these writings as a storm is about to burst upon us. We will have to find a better way back!

8/10/88

Well, I finally made it. - the view is certainly worth it. Helen, Sally (10) and Julie (5) are just 300 metres down the ridge to the north - so they made it too.

Started off in glorious weather this morning and wandered (grunked!) up: it's now clouded over but there's a break in the cloud over Lake Tarrans which is making it glow like a golden mirror in the west, while the Pond is majestically sitting in the haze — to the North it might even be — dare I say it — rain!

Besides Carolyn (Caz) Baldwin (AUMC Prez) and Kiri, Hugh Van Noorden, we are Mike Fuller (owner of the aforesaid knees) Adrian Flitney, Penny Wong, Steve Harris (who's looking like he's had a round or two with Jeff Fenech due to hayfever of some sort) Steve Crawley (who's carrying the sack and the pot) and me;

Finally arrived in the Andes after many years dreaming of it. In 2000 it was time to get out of the garden that offers the most spectacular views to the sea as this certainly is a magnificent spot in Australia. Traveled from Black Gap 7:00am - 10:00am on a fine & windy day. Heading out of the Andes shortly - farewell!

Here's a joke for all you new comers

A plane was travelling overseas when
all of a sudden over the intercom comes
a message - We are going to crash.

The hostess stands up and asks
Are there any men out there that
feel like a woman before
the plane crashes?

A man at the far end of the plane stood up. (A pretty handsome 1)
He starts slowly walking to the hostess unbuttoning his shirt as he went.

When he got to her he threw his shirt at her feet and said 'I can make you feel like a woman, you can start by washing or ironing that.'

as none of the work was done in light rain.

Views are certainly panoramic & we will enjoy sleeping

We were surprised when reading the log-book to learn
that this is a 0.5 Wright-free zone. All observation
would be subject to the risk of being violated by the
advisory observation parties of 0.5 Wright. May it
have been this way.

BRIAN JENKINS (ADELAIDE - SA)

Almost 30 years since I first saw Elder Range Haven, the guts or ability to tackle that face. However cycled down Murray Trail from Mt. Latta Station camp yesterday. Arrived & camped down a small creek. Made it here just before noon in 3 hours. Spent enjoyable half hour reading book - well done ABW. Never get tired of these type views in the Flinders. Lovely cool sunny day - just no. some butterflies, couple of big buzzing bush flies (harmless), some small twittering birds - the odd possum, wallabies. Magnificent! Could stay here for hours yet but expected to wait for the Rawhides tomorrow night. Cheers to all. BJ

this now & something that we
always go there as you will with
whoever you come here & with
well until next time. Happy

20/5/05 We were on an absolutely gorgeous sunny day, accompanied by a beautiful yellow and orange flying, a bright little bird and a lovely, shining view. A fairly small bird, about looks like there may be some in coming in from the west. There are a few birds around, some to check out on the way up. Seemed to be a lot of interest in the bird. Really, all that interesting, really, but I don't know how to say it.
